

THE G3HSC 7" MORSE CHECK RECORD

This check record is designed as part of the Beginners Course and is not a TRAINING record, nor should it be used as such. It simulates a G.P.O. test, being the same length, number of words etc. but jumbled up to prevent you from learning them too easily. (The actual G.P.O. test is as set out in the Beginners Instruction Book and is of course only in plain language.)

The Morse on this record is in STRICT TEMPO and is recorded with a soft type of keying, whereas on the instruction records hard keying is used so that you will have experience of both types.

Whereas those who have learnt by the RHYTHM BEGINNERS COURSE will not require the following check sheet as they will know instinctively if they make a mistake it is reproduced for those who have not yet obtained the RHYTHM COURSE.
