

# CODE TUTOR

## RADIO CODE INSTRUCTOR

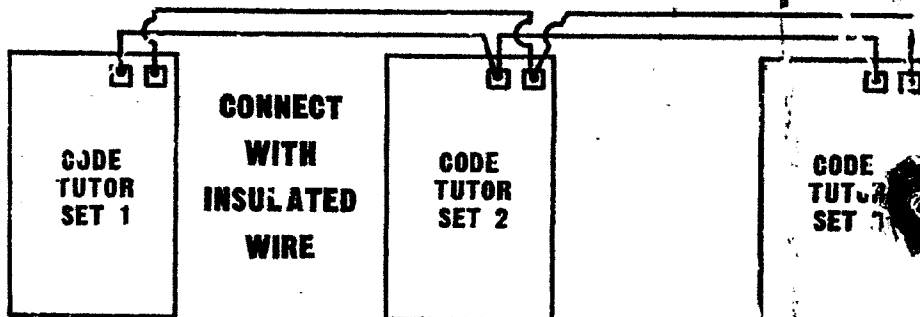

CODE TUTOR is an educational device made up of the part shown in Figure 1, mounted substantially on a solid base with felt pads.

Construction is of high quality thruout to insure long, satisfactory service. Only the battery, consisting of 3 flashlight type cells, will require occasional replacement. The buzzer is precision built, with an adjusting screw to obtain a true musical tone equivalent to radio signals.

Operation is easy and requires no previous experience. Simply hold the contact stylus like a pencil and draw it at uniform speed completely across the code board in the slot adjacent to a character on the left hand margin. You will be thrilled with the perfect transmission sounded by the tone buzzer. Turn it at a slow or fast, the character is always correctly sounded. Then, operate the telegraph key to duplicate the transmission of the code character. It is amazing how quickly the code can be mastered.

Two or more CODE-TUTORS can be connected together for inter-communication, as diagramed above, with the operators located in different parts of the house or next door to each other.

CODE TUTOR will delight youngsters and anyone desiring to learn perfect transmission. CODE-TUTOR is not a toy but is definitely a scientific device of rugged construction, guaranteed to give service and satisfaction.

Now at Low Cost, you can get the CODE-TUTOR with all the advantages of expensive code transmitting machines which are recognized as indispensable in acquiring perfect transmitting technique.
