## The ICA Series of Code Sets

*Manufacturers of radio-electronic equipment for over a quarter-century, ICA has designed this Code Set Series especially for the beginner interested in code communication.*

### ICA "TRIPLEX"—No. 70

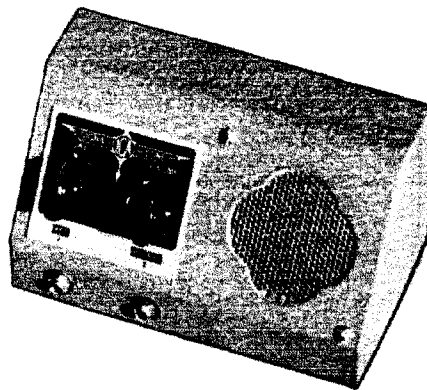

A compact well-made Code Practice Set. Ideal for learning telegraphy—Radio Code Signals and Blinker or Navy Signaling. Simple and economical to operate. Requires but two standard flashlight batteries. Legible code instructions mounted on signal box face. Composed of a high frequency buzzer-blinker light and telegraph sounder. Panel board switch permits changing from one type signal to another. Two clips provide for connecting additional set, permitting sending or receiving by either set. Individually packed with complete instructions.

"DUAL TRIPLEX"—No. 71. A double "Triplex" complete with wiring. May be arranged for sending and receiving.

### ICA DE LUXE SIGNATONE No. 4300

Audio Oscillator—Code Practice Set—Keying monitor. Complete with tube and speaker for 110 V AC-DC. May be used as CODE PRACTICE SET—Phones and keys may be connected for inter-communication for classroom or club code instruction. KEYING MONITOR—to improve "ham's" fist. MODULATION SIGNAL—SIGNAL TRACER.

### SIGNATONE CLASSROOM MODEL No. 4301—Complete with tube

Designed primarily for class and radio club use. Intended for use with earphones, these are preferable to speakers, for instruction purposes. If desired, however, speakers may be used instead of phones.

Features 3-tone audio output, continuously variable control and extra terminals for keys and phones. Quality is same as De Luxe Signatone. For 110 volts AC-DC.

Complete instructions furnished for a class room set-up for send-receive practice.
